

AppDynamics Lite vs Pro

Upgrade to AppDynamics Pro and get support for unlimited application deployments across your entire business

Extended Capabilities

With AppDynamics Pro, you can purchase as many units as you need to support your applications as they grow over time. The more units you purchase, the greater your discount will be.

Longer Data Retention

Data retention in AppDynamics Lite is limited. With AppDynamics Pro you'll get over a year of data retention, enabling you to analyze release comparisons, capacity trending, or seasonal variations.

World-class Support

With AppDynamics Lite, support is limited to posting your questions to our community forums. Once you upgrade to AppDynamics Pro you get the full attention of our support staff via both helpdesk and email.

Compare All Features

Application Performance Management	Lite	Pro
------------------------------------	------	-----

Code level visibility ?

Dynamic baselining and powerful alerting ?

Visibility and control ?

Application performance management agents ?

One Each

Unlimited

Data retention ?

24 hours

Years

Database Visibility	Lite	Pro
---------------------	------	-----

Monitor multiple platforms ?

Troubleshoot performance issues in production ?

Trend database performance over time ?

Continuously monitor in a high-volume environment

Install and begin using immediately ?

Database agents ?

One Each

Unlimited

Server Visibility

Lite

Pro

Monitor Windows and Linux Systems
